Behaviour

Helpful resources for parents and carers

These resources help you understand why distressed behaviour, anxiety and big emotions happen — and offer practical, tried-and-tested strategies to support your child (and yourself).

These universal resources are aimed at parents and carers local to Orkney.

Start with these

Easy first steps – quick and helpful resources

Understanding anxiety & distressed behaviour

NEST · 3-part video series

A series of 3 workshops explaining how anxiety and distressed behaviour can be linked to communication and sensory issues, and offering strategies through professional and lived experience.

Video series

Part 1 | Part 2 | Part 3

For specific help

Build your understanding and try new ideas

Distressed behaviour: a guide for all audiences

National Autistic Society

Distressed behaviour can have a negative impact on both the child and their family. The National Autistic Society suggests some strategies to try, including keeping a behaviour diary.

Online guide

autism.org.uk

Managing anger

National Autistic Society

NAS has published a guide giving practical suggestions on how parents and carers can support their child, including preventing and managing anger.

Using a visual timetable

NHS Lothian

When someone is unsure what to expect in a situation, if they haven't learned the skills needed, or have had unhelpful previous experiences, they may be unsure or unwilling to take part in an activity. This video explains ways to support and encourage children and young people to participate in day-to-day activities.

Self-injurious behaviour (SIB)

NHS Shetland

Self-injurious behaviour is a form of hurting oneself, which can happen due to over-stimulation, environmental factors, pain, escape or avoidance, sensory needs, or needing attention. This guide explains why SIB might happen for people with learning disabilities and/or autism, and signposts to further information and support.

A guide to energy accounting

National Autistic Society

This guide from the National Autistic Society explores how to manage energy levels using a technique called energy accounting — using the idea of a bank account, where the withdrawals and deposits are energy rather than money. Aimed at supporting teenage children.

Booklet with worksheets

Different behaviour between home and school

National Autistic Society

Often referred to as masking, it isn't unusual for parents to describe a child's behaviour as different at home than at school — described by Tony Atwood as the 'Jekyll and Hyde' character. NAS provides an online guide investigating this further.

Explore the topic in more depth

What is emotional dysregulation?

Psychology Today · Academic article, open access

Psychology Today published an article entitled 'What is Emotional Dysregulation' and provides tips to help parents manage their emotions – including exercise, deep breathing, yoga and acceptance. This can then help their child or young person.

PDA Society

Website

The PDA Society's mission is to improve the lives of PDA children, PDA adults and their families, offering information and 'what helps?' guides.

Eating & Drinking

Helpful resources for parents and carers

These resources offer practical strategies and understanding around fussy, selective and restrictive eating — helping you support your child's relationship with food and mealtimes.

These universal resources are aimed at parents and carers local to Orkney.

Start with these

Easy first steps – quick and helpful resources

Fussy or selective eating

Bedfordshire & Luton Children's Health (NHS)

These NHS videos provide an introduction to fussy eating, including a comparison between common fussy eating and extreme selective eating, and ideas to help with fussy eating and manage mealtimes more effectively.

Video (2)

bedslutonchildrenshealth.nhs.uk

Fussy eating toolkit

NHS Grampian

A practical guide to managing fussy eating, including a food diary and action plan to help parents and carers monitor food intake and track progress towards goals. It provides a range of practical tips, strategies and supporting resources.

Online booklet

Supporting autistic people with eating difficulties

National Autistic Society

Dr Elizabeth Shea, a Clinical Psychologist, explores factors that can contribute to eating difficulties. The article draws on clinical experience and considers sensory sensitivities and cognitive factors. This may be useful to parents who want to understand why their child may be experiencing difficulties with food.

Support for bowel & bladder difficulties

ERIC – The Children's Bowel and Bladder Charity

ERIC provides information, advice and support to help families manage bowel and bladder difficulties. We've included this because some children with constipation may not want to eat, due to a sore tummy – supporting the constipation can, in turn, support eating and drinking.
